Hi Ranjit,

Please find DPL ingestion and Sqoop steps in attachment. Pls be aware the triggering process may change in UAT (Defect 9143).

I also attached the WORD document sent by Phaneendra for other source' sqoop steps for reference in case more information is required.

Thanks and Regards

Hi Winnie,

Please also document the steps for doing ingestion from Dataphile-Prod (as we will need someone to take over for future ingestions)

Regards,  
Ranjit

Thanks Winnie for below summary/updates.

I will synch with you tomorrow morning (I didn't get much time this week, as have been all day training), and discuss the hand-overs of tasks. Please ensure that you have all the test scripts which you have worked upon are checked-in SharePoint

Regards,  
Ranjit

**Subject:** RE: my current plan

Hi Ranjit,

Just update my current status as below:

1. Vikram just provided hotfixes for trowse curation (daily and monthly), as well as c-from(Phaneendra is taking care). I will clean up the tables, rerun curation jobs and then re validate day0 defects to complete day0 testing. I am sure I can complete this by end of today. If I will have some extra time, I can prepare test data in type tables for day1 by today.
2. I have to wrap up DPL ingestions, including to execute test cases in HPALM and to upload test evidence to HPLAM and Sharepoint to make sure I hand over everything for reference in future.
3. I think I won't have enough time to execute day1 trowse curation. Please consider to assign to other team folk to make sure it can be continually tested. I will share all my test scripts. Also I will upload everything to SP.
4. I have communicated with Joshua that I will return laptop and other items listed in his email by tomorrow afternoon around 4pm in download building.
5. If there is anything I missed here, please let me know.

Thanks and Regards

**Subject:** my current plan

Hi Ranjit,

As you already knew, I worked on weekend (days and hours shown in below) for DPL Ingestion as per the working windows Aravinda gave to us. You declined my hours charged for weekend (you mentioned pre\_approval was required), you said I can arrange my time to logoff early in working days.

- May 16<sup>th</sup> - 2 hours
- May 17<sup>th</sup> - 6 hours
- May 24<sup>th</sup> - 4 hours

I am planning to be off on Thursday (May 28<sup>th</sup>, 8 hours) and first half of Friday ( May 29<sup>th</sup>, 4 hours). Please let me know if you have concerns.

Also, I have below tasks in my hands:

- To complete DPL Ingestion day1 data validation - Planned to complete by today
- To revalidate DPL Ingestion day0 data as regression - Planned to complete by today
- To rerun ingestion after today's code promotion to retest/revalidate defects (8945, 9021 and 9113) - planning to complete by noon of tomorrow
- To modify trowe (daily/monthly) curation scripts base on FX Rate logic changes in STM, and validate trowe curation for day0 and day1. (Assigned to me late yesterday evening)

By default, I prioritize the 4 tasks in the order it shows. Please advise your suggestion of priority. Thanks

Thanks and Regards
